

- Camera Model Canon EOS R50
- Scenario Portrait
- Lighting Condition Overcast

Recommended Mode

Aperture Priority

Shutter Speed

1/250s–1/500s

Aperture

f/2.0–f/2.8

ISO

Auto, ceiling 1600

Focus Mode

Face and Eye AF

Drive Mode

Single Shot

White Balance

Cloudy

CAMERAS
DECODED

Key Setting Note:

Overcast light acts as an enormous softbox—the cloud layer diffuses the sun into soft, shadowless illumination that flatters skin and eliminates harsh contrast. The Cloudy white balance preset adds a gentle warmth that compensates for the naturally cool cast of overcast light; if you prefer a more neutral rendering, switch to Daylight white balance to preserve the moody atmosphere. Overcast light is ideal for shooting wide open on a fast lens without worrying about exceeding the R50's maximum shutter speed—at f/1.8 in overcast light, ISO 100 and 1/4000s are often achievable, giving you the shallowest possible depth of field with no risk of overexposure. The RF 50mm f/1.8 STM performs at its absolute best here, with soft background bokeh complementing the gentle, even light on the subject's face. The R50's compact size makes it easy to move around the subject and find the most flattering angle.

Inner Signal Note:

"Overcast light asks nothing of the R50. It is soft, even, and endless. No harsh shadows. No squinting subject. No blown highlights. The camera simply records what the sky has already perfected. Your only job is to find the moment between the clouds when the subject forgets the camera exists."
