Key Setting Note:

Bright natural light is where the R6 Mark II performs closest to a dedicated sports body. The 24-megapixel sensor delivers clean, detailed files at low ISOs, and the Dual Pixel CMOS AF II with Subject Tracking is fast and confident in bright, contrasty light. Set Subject to Detect to People, Eye Detection to Auto, and AF Case to 2 (Continue to Track Subjects, Ignoring Obstacles) to keep AF locked on the primary athlete. The 40fps electronic shutter allows you to capture extended sequences of action—a soccer run, a track sprint, a baseball swing—without the camera slowing down. Enable Pre-shooting (Raw Burst Mode) to capture frames from 0.5 seconds before you fully press the shutter. The R6 II's electronic shutter is fast enough that rolling shutter distortion is minimal even at 40fps.

Inner Signal Note:

"Bright natural light forgives everything—except hesitation. The R6 II will expose accurately, focus instantly, and deliver clean files at ISO 800. But it will not read the play before it happens. The camera does not know when the ball will leave the hand, when the sprint will peak, or when the finish line will be crossed. The decisive moment belongs to the photographer who is ready, not the one who sprays."
