

- Camera Model Sony A6700
- Scenario Real Estate
- Lighting Condition Bright Natural

Recommended Mode

Aperture Priority

Shutter Speed

1/125s–1/250s

Aperture

f/8–f/11

ISO

100

Focus Mode

Single AF

Drive Mode

Single Shot

White Balance

Daylight

Key Setting Note:

The compact size and fully articulating screen allow you to hold the camera low to the floor, above your head, or in tight corners while still composing clearly on the flipped-out screen—a genuine advantage over larger full-frame rigs in confined spaces. The Sony E 10-20mm f/4 G provides a 15-30mm full-frame equivalent field of view and is sharp at f/8–f/11, making it the ideal ultra-wide zoom for this system. For rooms with bright windows and darker interior corners, bracket three exposures (± 1.5 EV) and blend later; the A6700's DRO/Auto HDR can handle moderate dynamic range, but manual bracketing produces superior results for critical listing photos. Enable the Grid Line display (Rule of Thirds) to keep verticals perfectly straight—tilted walls are the single most common amateur mistake regardless of the camera used. A tripod remains recommended for the hero shot, though the A6700's IBIS allows safe handheld shooting at 1/125s for quick walkthroughs.

Inner Signal Note:

"Bright natural light forgives everything. The A6700 needs no high ISO ceiling, no tripod if the light is strong enough. It simply needs the ultra-wide lens, a straight vertical, and the patience to find the angle that makes a stranger imagine their life in this room. The camera is ready. The room is waiting."
