

- Camera Model Sony A6700
- Scenario Real Estate
- Lighting Condition Golden Hour

Recommended Mode

Aperture Priority

Shutter Speed

1/30s–1/125s

Aperture

f/8–f/11
(interiors);
f/5.6–f/8
(exteriors)

ISO

100

Focus Mode

Single AF

Drive Mode

Single Shot

White Balance

Daylight

Key Setting Note:

The A6700's compact size and fully articulating screen make it ideal for awkward golden hour angles—you can hold it low to capture light streaming across tiles, above your head for ceiling details with warm reflections, or in tight corners where a full-frame body wouldn't fit. The APS-C sensor requires a wider lens; the Sony E 10-20mm f/4 G provides a 15-30mm full-frame equivalent, ideal for interiors. For high-dynamic-range golden hour rooms with bright windows and darker corners, bracket three exposures (± 1.5 EV) and blend later; the A6700's DRO/Auto HDR handles moderate scenes, but manual bracketing produces superior results. Set White Balance to Daylight to preserve the natural golden warmth—avoid Auto WB, which will try to neutralize the very light you are chasing. Enable the Grid Line display (Rule of Thirds) to keep verticals straight, and use a tripod for critical interior shots where the slow shutter speeds (1/30s or slower) demand absolute stability.

Inner Signal Note:

"Golden hour real estate is not about the camera. It is about the light, the tripod, and the patience to wait for the sun to reach the right angle. The A6700 will capture whatever you point it at. Point it at the moment the room glows. The listing will look professional because the light was professional, and your technique honored it."
