

- Camera Model Sony A6700
- Scenario Real Estate
- Lighting Condition Overcast

Recommended Mode

Aperture Priority

Shutter Speed

1/30s–1/60s

Aperture

f/8–f/11

ISO

100

Focus Mode

Single AF

Drive Mode

Single Shot

White Balance

Cloudy

Key Setting Note:

The Sony E 10-20mm f/4 G provides a 15-30mm full-frame equivalent field of view and captures entire rooms at 10mm (15mm equivalent). The A6700's IBIS is a genuine advantage here—it allows you to handhold at 1/30s with a steady stance, producing acceptably sharp images for quick walkthrough previews. However, for the hero shot of the main living space, use a tripod. The difference between a sharp, tripod-mounted overcast interior and a slightly soft handheld one is the difference between a premium listing and an amateur one. Set White Balance to Cloudy rather than Auto to prevent inconsistent color shifts as cloud density changes. Focus approximately one-third of the way into the room to maximize front-to-back sharpness, and enable the Grid Line display to keep verticals perfectly straight.

- Inner Signal Note:

"Overcast light asks nothing of the A6700. It is soft, even, and endless. No harsh shadows. No blown-out windows. No squinting into the sun. The room is bathed in a gentle, diffused glow that flatters every surface. Use the tripod for the hero shot. Keep the verticals straight. The listing will look professional because the light did the heavy lifting, and the technique did the rest."
