

- Camera Model Sony A7IV
- Scenario Portrait
- Lighting Condition Overcast

Recommended Mode

Aperture Priority

Shutter Speed

1/250s–1/500s

Aperture

f/1.4–f/2.0

ISO

Auto, cap at 800

Focus Mode

Face and Eye AF

Drive Mode

Single Shot

White Balance

Daylight

CAMERAS
DECODED

Key Setting Note:

Overcast light is the most forgiving natural light for portrait photography. The cloud layer acts as an enormous softbox, diffusing the sun into a shadowless, even illumination that flatters skin and eliminates harsh contrast. The A7IV's Eye Detection AF works confidently in the low-contrast light, and the 33-megapixel sensor captures enough detail to reveal texture in skin and fabric without the harshness of direct sun. For a slightly editorial look, use the Creative Look profile FL (Film Look) with Contrast increased by 1 — this adds back some of the definition that the soft overcast light can flatten.

- Inner Signal Note:

"Overcast light asks nothing of the camera. It is soft, even, and endless. No harsh shadows. No squinting subject. No blown highlights. The A7IV simply records what the sky has already perfected. The only variable is whether you raise the camera to your eye when the subject forgets you are there."
